

Outcomes Health Information Solutions Receives “Thumbs Up” From AAPC

The American Academy of Professional Coders (AAPC) has given its approval for Outcomes Health Information Solutions (OHIS) to issue continuing education units (CEUs) for 2 of its coding programs. OHIS' certified coders and nurses will receive 2 CEUs when they complete the initial training program. In addition, OHIS will be hosting 4 open forums per month where members of the clinical auditing team will receive 1 CEU per session, up to 14 per year.

This distinction is a testament to OHIS' commitment to quality. OHIS' robust coding training program includes clinical coding documentation training and benchmark proficiency testing. OHIS ensures coding compliance through its rigorous quality assurance program, monitoring the work performed by every nurse and coder on staff. At OHIS, auditing accuracy is top priority and clients have taken note. One of OHIS' health plan customers recently stated, "...I sleep well at night, knowing that Outcomes' accuracy rate is above 95%..."

The clinical auditing team is part of OHIS' service delivery platform which uses powerful, proprietary technology to capture and integrate healthcare data to be used by organizations on an enterprise-wide scale. Clients report that partnering with OHIS has given them the opportunity to gain access to more accurate, "improved" data quickly. Now OHIS' clients enjoy immediate access to the valuable data they have always wanted to help them make better operational decisions faster than ever before.
